

KWAZAR GUIDE TO FENCING STAPLES

Staples Information

1 Fuel Powered Staple Guns

The majority of guns take 3.1/3.15 (same) width staples. Our 3.15 staples are suitable for them all.

Certain guns take 4.00mm width staples. E.G. Stockade, DeWalt, Milwaukee and Delfast. And now, our Montana.

Stockade, DeWalt, Milwaukee and DeWalt all take only proprietary staples.

2 New

We now have adaptors for Dewalt and Milwaukee so that they can take standard staples.

We have taped and barbed, or glued and knurled staples suitable for stockade or guns using our adaptor.

Our own Montana 4.00ml gun takes a different glued staples.

Tests show that knurled are as effective as barbed.

3 Loose, manually fixed fence staples

Nearly all are barbed, 4.0mm width with either 40, 45, or 50mm length. Generally come in tubs of 5kg, 10kg and 20kg

Why Choose Us

Easy ordering, great service and best prices.
